## **Section 2: Product Information**

### **Product #1**

Product Name:

Product SKU:

Product Description:

If this application is for recertification or modification, then please skip to the next product or section.

Certification Type:

Is the product an equivalent form of an already certified product or another product on this application? Equivalent forms are compositionally identical except for one or more of the following: physical dimensions (thickness, diameter, etc.), density, dilution in water, grade of ingredients, proportion of ingredients (some restrictions may apply). If so, list the certification number or product name:

Complete an ingredient list in Appendix 1 for each product, listing each ingredient in the product (provide an attachment if more space is needed).

### **Product #2**

Product Name:

Product SKU:

Product Description:

Certification Type:

If this application is for recertification or modification, then please skip to the next product or section.

Is the product an equivalent form of an already certified product or another product on this application? Equivalent forms are compositionally identical except for one or more of the following: physical dimensions (thickness, diameter, etc.), density, dilution in water, grade of ingredients, proportion of ingredients (some restrictions may apply). If so, list the certification number or product name:

Complete the table on the next page, listing each ingredient in the product (provide an attachment if more space is needed).
